General question about multiple steps in solid mechanics

the first is a tension applied to the end of a rod the second is a shear applied at the top of the rod I know what you could model this as a single step, but I am trying to get a handle of how Comsol works so have split it into two steps.

Applied Mechanics of Solids CRC Press Book

Applied Mechanics of Solids is a powerful tool for understanding how to take advantage of these revolutionary computer advances in the field of solid mechanics. Beginning with a description of the physical and mathematical laws that govern deformation in solids, the text presents modern constitutive equations, as well as analytical and computational methods of stress analysis and fracture

Applied Solid Mechanics by Peter Howell cambridge org

The world around us, natural or man-made, is built and held together by solid materials. Understanding their behaviour is the task of solid mechanics, which is in turn applied to many areas, from earthquake mechanics to industry, construction to biomechanics.
