[Periodic function - Wikipedia](#)

In mathematics, a periodic function is a function that repeats its values in regular intervals or periods. The most important examples are the trigonometric functions , which

repeat over intervals of 2 radians .

Functions in the Real World | Education World

The standards overview for grades 3-5 expects the understanding that "in the 'real-world,' functions are mathematical representations of many input-output situations." As we point out and use functions in real-life settings, we can ask our students to keep alert for other input-output situations in the real world.

MedlinePlus Medical Encyclopedia: Failure to = thrive

Alternative=20 Names . Growth failure;=20 FTT =20

Definition =20 = I-Return=20 to top Failure to thrive is a

description = applied to=20 children whose current weight or rate of weight gain is significantly = below that=20 of other children of similar age and sex.
