What does proof on a balance of probabilities mean

Saying something is proven on a balance of probabilities means that it is more likely than not to have occurred. It means that it is probable, i.e., the probability that some event happens is more than 50%. So mathematically proof on a balance of probabilities is 50.1% likelihood of something having occurred.

Conventional Stochastic Sequences in Reliability

A simplification of probability based approaches on safety assessments and predictions of structural members is discussed. The modelling of time-dependent survival probabilities and reliability indexes of particular and single members is defined in a simple and easy perceptible manner using uniformed

Its premise is that both aces and kings may safely be shown in response to a Blackwood-type 4NT enquiry; provided that such
