Erikson's Stages of Human Development - Psychologist World

The theory describes eight stages through which a healthily developing human should pass from infancy to late adulthood. In each stage the person confronts, and hopefully masters, new challenges. Each stage builds on the successful completion of earlier stages. The challenges of stages not successfully completed may be expected to reappear as problems in the future.

This psychology makes broader generalizations, so open your mind to thinking in terms of patterns over decades of time.

The Four Stages of Life | Mark Manson

Life is a bitch. Then you die. So while staring at my navel the other day, I decided that that bitch happens in four stages. Here they are. We are born helpless. We can't walk, can't talk, can't feed ourselves, can't even do our own damn taxes. As children, the way we're wired to learn is
